Image Processing and GIS for Remote Sensing: Techniques and Applications

Jian Guo Liu, Philippa J. Mason

Image Processing and GIS for Remote Sensing: Techniques and Applications Jian Guo Liu, Philippa J. Mason

Following the successful publication of the 1st edition in 2009, the 2nd edition maintains its aim to provide an application-driven package of essential techniques in image processing and GIS, together with case studies for demonstration and guidance in remote sensing applications. The book therefore has a “3 in 1” structure which pinpoints the intersection between these three individual disciplines and successfully draws them together in a balanced and comprehensive manner.

The book conveys in-depth knowledge of image processing and GIS techniques in an accessible and comprehensive manner, with clear explanations and conceptual illustrations used throughout to enhance student learning. The understanding of key concepts is always emphasised with minimal assumption of prior mathematical experience.

The book is heavily based on the authors’ own research. Many of the author-designed image processing techniques are popular around the world. For instance, the SFIM technique has long been adopted by ASTRIUM for mass-production of their standard “Pan-sharpen” imagery data. The new edition also includes a completely new chapter on subpixel technology and new case studies, based on their recent research.

From reader reviews:

Donnie Matthews:

Have you spare time for a day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity for spend your time. Any person spent their spare time to take a walk, shopping, or went to the particular Mall. How about open or read a book entitled Image Processing and GIS for Remote Sensing: Techniques and Applications? Maybe it is to get best activity for you. You recognize beside you can spend your time together with your favorite's book, you can smarter than before. Do you agree with it is opinion or you have different opinion?

Sang O\'Connor:

Nowadays reading books become more and more than want or need but also work as a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge the particular information inside the book that will improve your knowledge and information. The information you get based on what kind of reserve you read, if you want attract knowledge just go with training books but if you want feel happy read one along with theme for entertaining like comic or novel. The Image Processing and GIS for Remote Sensing: Techniques and Applications is kind of guide which is giving the reader erratic experience.

Jason Howell:

The actual book Image Processing and GIS for Remote Sensing: Techniques and Applications will bring you to the new experience of reading a book. The author style to describe the idea is very unique. In case you try to find new book to read, this book very suitable to you. The book Image Processing and GIS for Remote Sensing: Techniques and Applications is much recommended to you to learn. You can also get the e-book from the official web site, so you can quicker to read the book.

Loretta Pena:

This Image Processing and GIS for Remote Sensing: Techniques and Applications is great publication for you because the content and that is full of information for you who have always deal with world and also have to make decision every minute. This book reveal it data accurately using great arrange word or we can say no rambling sentences inside. So if you are read that hurriedly you can have whole info in it. Doesn't mean it only provides you with straight forward sentences but tricky core information with attractive delivering sentences. Having Image Processing and GIS for Remote Sensing: Techniques and Applications in your hand like getting the world in your arm, data in it is not ridiculous one particular. We can say that no publication that offer you world in ten or fifteen second right but this reserve already do that. So , it is good reading book. Hey there Mr. and Mrs. busy do you still doubt this?
