Advanced Piping Design (Process Piping Design) (v. II)

Rutger Boterman, Peter Smith

Advanced Piping Design (Process Piping Design) (v. II) Rutger Boterman, Peter Smith

Advanced Piping Design is an intermediate-level handbook covering guidelines and procedures on process plants and interconnecting piping systems. As a follow up with Smith's best-selling work published in 2007 by Gulf Publishing Company, *The Fundamentals of Piping Design*, this handbook contributes more customized information on the necessary process equipment required for a suitable plant layout, such as pumps, compressors, heat exchangers, tanks, cooling towers and more! While integrating equipment with all critical design considerations, these two volumes together are must-haves for any engineer continuing to learn about piping design and process equipment.
