House and Psychology: Humanity Is Overrated
An irresistible look within the mind and behind the hit TV drama, *House*

While *House* is a smart medical drama and Gregory House faces countless ethical quandaries as a doctor, what makes the show unique is that it's much more deeply rooted in psychology than in medicine. At its core, *House* is a show about the mind and human behavior. Gregory House is a medical genius and a Sherlock Holmesian figure, but he's also a deeply troubled misanthrope. What's going on inside the brain of this beloved, arrogant, cane-waving curmudgeon that is so appealing? *House and Psychology* tackles this question and explores the latest findings in brain science research, defines addiction in its many forms, and diagnoses dysfunctional relationships, all using test cases at Princeton-Plainsboro Hospital.

- Offers a revealing psychological profile of Gregory House and his team
- Uses the latest psychological theory and research to answer questions ranging from "How does House handle addiction?" to"Why does he act like such a jerk?"
- Features contributions from a group of world-renowned psychological experts who also happen to love *House*

Essential reading for every *House* fan, *House and Psychology* will help you discover the extraordinary mental universe of your favorite brilliant, bombastic, bile-belching doctor of medicine.
