Resilience and Transformation: Preparing Australia for Uncertain Futures

Resilience and Transformation: Preparing Australia for Uncertain Futures
Resilience and Transformation explores what factors contribute to Australia's resilience, what trends are apparent, and what actions are required to better prepare us for the immediate and longer term future. Resilience is a word used more and more across societies worldwide as decision makers realise that predicting and controlling the future does not work and that preparing for uncertainty and surprise is vital. Many viewpoints have emerged on how to assess and achieve resilience of individuals, organisations, communities and ecosystems, but rarely has the resilience of a nation been considered. As Australia moves into a millennium that promises major economic, social, technological and environmental change, Australia21 has assembled some of Australia's leading thinkers to give their perspectives on the extent and direction of resilience across our nation's social, economic, ecological and disaster management systems.
