Advanced Mathematical Methods for Finance

Julia Di Nunno

Advanced Mathematical Methods for Finance Julia Di Nunno
This book presents innovations in the mathematical foundations of financial analysis and numerical methods for finance and applications to the modeling of risk. The topics selected include measures of risk, credit contagion, insider trading, information in finance, stochastic control and its applications to portfolio choices and liquidation, models of liquidity, pricing, and hedging. The models presented are based on the use of Brownian motion, Lévy processes and jump diffusions. Moreover, fractional Brownian motion and ambit processes are also introduced at various levels. The chosen blend of topics gives an overview of the frontiers of mathematics for finance. New results, new methods and new models are all introduced in different forms according to the subject. Additionally, the existing literature on the topic is reviewed.
The diversity of the topics makes the book suitable for graduate students, researchers and practitioners in the areas of financial modeling and quantitative finance. The chapters will also be of interest to experts in the financial market interested in new methods and products.
This volume presents the results of the European ESF research networking program Advanced Mathematical Methods for Finance.

From reader reviews:

Pearl McLean:

Do you certainly one of people who can't read pleasurable if the sentence chained inside straightway, hold on guys this aren't like that. This Advanced Mathematical Methods for Finance book is readable by you who hate the perfect word style. You will find the information here are arrange for enjoyable examining experience without leaving also decrease the knowledge that want to deliver to you. The writer associated with Advanced Mathematical Methods for Finance content conveys the thought easily to understand by most people. The printed and e-book are not different in the articles but it just different by means of it. So , do you nevertheless thinking Advanced Mathematical Methods for Finance is not loveable to be your top checklist reading book?

Brenda Rodriguez:

Are you kind of busy person, only have 10 or even 15 minute in your moment to upgrading your mind proficiency or thinking skill perhaps analytical thinking? Then you have problem with the book compared to can satisfy your short period of time to read it because this all time you only find book that need more time to be examine. Advanced Mathematical Methods for Finance can be your answer mainly because it can be read by an individual who have those short spare time problems.

Amanda Furr:

On this era which is the greater person or who has ability in doing something more are more special than other. Do you want to become certainly one of it? It is just simple way to have that. What you are related is just spending your time almost no but quite enough to possess a look at some books. One of the books in the top checklist in your reading list is actually Advanced Mathematical Methods for Finance. This book which is qualified as The Hungry Slopes can get you closer in getting precious person. By looking upward and review this book you can get many advantages.

Bruce Williamson:

Reading a publication make you to get more knowledge from that. You can take knowledge and information coming from a book. Book is created or printed or highlighted from each source that filled update of news. Within this modern era like now, many ways to get information are available for you actually. From media social like newspaper, magazines, science reserve, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Do you want to spend your spare time to open your book? Or just seeking the Advanced Mathematical Methods for Finance when you desired it?
