Phonetic Search Methods for Large Speech Databases (SpringerBriefs in Electrical and Computer Engineering) Ami Moyal, Vered Aharonson, Ella Tetariy, Michal Gishri
“Phonetic Search Methods for Large Databases” focuses on Keyword Spotting (KWS) within large speech databases. The brief will begin by outlining the challenges associated with Keyword Spotting within large speech databases using dynamic keyword vocabularies. It will then continue by highlighting the various market segments in need of KWS solutions, as well as, the specific requirements of each market segment. The work also includes a detailed description of the complexity of the task and the different methods that are used, including the advantages and disadvantages of each method and an in-depth comparison. The main focus will be on the Phonetic Search method and its efficient implementation. This will include a literature review of the various methods used for the efficient implementation of Phonetic Search Keyword Spotting, with an emphasis on the authors’ own research which entails a comparative analysis of the Phonetic Search method which includes algorithmic details.
This brief is useful for researchers and developers in academia and industry from the fields of speech processing and speech recognition, specifically Keyword Spotting.

From reader reviews:

Anna Yates:

Why don't make it to become your habit? Right now, try to prepare your time to do the important work, like looking for your favorite e-book and reading a guide. Beside you can solve your problem; you can add your knowledge by the e-book entitled Phonetic Search Methods for Large Speech Databases (SpringerBriefs in Electrical and Computer Engineering). Try to make the book Phonetic Search Methods for Large Speech Databases (SpringerBriefs in Electrical and Computer Engineering) as your friend. It means that it can for being your friend when you feel alone and beside those of course make you smarter than before. Yeah, it is very fortuned for yourself. The book makes you a lot more confidence because you can know every thing by the book. So , let me make new experience as well as knowledge with this book.

Christopher Larsen:

Book is actually written, printed, or highlighted for everything. You can understand everything you want by a publication. Book has a different type. We all know that that book is important issue to bring us around the world. Beside that you can your reading talent was fluently. A publication Phonetic Search Methods for Large Speech Databases (SpringerBriefs in Electrical and Computer Engineering) will make you to possibly be smarter. You can feel a lot more confidence if you can know about every thing. But some of you think that open or reading a book make you bored. It's not make you fun. Why they may be thought like that? Have you looking for best book or acceptable book with you?

Marian Storie:

This book untitled Phonetic Search Methods for Large Speech Databases (SpringerBriefs in Electrical and Computer Engineering) to be one of several books this best seller in this year, this is because when you read this book you can get a lot of benefit upon it. You will easily to buy this book in the book retail outlet or you can order it via online. The publisher in this book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Mobile phone. So there is no reason for you to past this reserve from your list.

David Furtado:

Many people spending their time by playing outside along with friends, fun activity having family or just watching TV the whole day. You can have new activity to shell out your whole day by examining a book. Ugh, think reading a book really can hard because you have to use the book everywhere? It all right you can have the e-book, having everywhere you want in your Touch screen phone. Like Phonetic Search Methods for Large Speech Databases (SpringerBriefs in Electrical and Computer Engineering) which is finding the e-book version. So , why not try out this book? Let's notice.
