Multimedia Software Engineering (International Series in Software Engineering)

Shi-Kuo Chang

Multimedia Software Engineering (International Series in Software Engineering) Shi-Kuo Chang
Multimedia has two fundamental characteristics that can be expressed by the following formula: Multimedia = Multiple Media + Hypermedia. How can software engineering take advantage of these two characteristics? Will these two characteristics pose problems in multimedia systems design? These are some of the issues to be explored in this book.
The first two chapters will be of interest to managers, software engineers, programmers, and people interested in gaining an overall understanding of multimedia software engineering. The next six chapters present multimedia software engineering according to the conceptual framework introduced in Chapter One. This is of particular use to practitioners, system developers, multimedia application designers, programmers, and people interested in prototyping multimedia applications. The next three chapters are more research-oriented and are mainly intended for researchers working on the specification, modeling, and analysis of distributed multimedia systems, but will also be relevant to scientists, researchers, and software engineers interested in the systems and theoretical aspects of multimedia software engineering.
Multimedia Software Engineering can be used as a textbook in a graduate course on multimedia software engineering or in an undergraduate course on software design where the emphasis is on multimedia applications. It is especially suitable for a project-oriented course.

From reader reviews:

Virginia Combs:

Nowadays reading books be than want or need but also get a life style. This reading habit give you lot of advantages. The advantages you got of course the knowledge your information inside the book this improve your knowledge and information. The knowledge you get based on what kind of e-book you read, if you want send more knowledge just go with schooling books but if you want really feel happy read one with theme for entertaining like comic or novel. The Multimedia Software Engineering (International Series in Software Engineering) is kind of book which is giving the reader erratic experience.

Beverly Bell:

Information is provisions for those to get better life, information currently can get by anyone on everywhere. The information can be a expertise or any news even a concern. What people must be consider any time those information which is inside the former life are challenging to be find than now could be taking seriously which one would work to believe or which one the resource are convinced. If you find the unstable resource then you buy it as your main information it will have huge disadvantage for you. All of those possibilities will not happen within you if you take Multimedia Software Engineering (International Series in Software Engineering) as your daily resource information.

Joel Newsom:

Hey guys, do you wants to finds a new book to learn? May be the book with the concept Multimedia Software Engineering (International Series in Software Engineering) suitable to you? The actual book was written by well-known writer in this era. The actual book untitled Multimedia Software Engineering (International Series in Software Engineering)is the main of several books that everyone read now. This book was inspired a number of people in the world. When you read this e-book you will enter the new shape that you ever know prior to. The author explained their thought in the simple way, therefore all of people can easily to know the core of this book. This book will give you a wide range of information about this world now. So you can see the represented of the world in this particular book.

Richard Jimenez:

Reading a publication tends to be new life style within this era globalization. With reading you can get a lot of information that could give you benefit in your life. Using book everyone in this world can easily share their idea. Guides can also inspire a lot of people. Plenty of author can inspire their reader with their story as well as their experience. Not only the story that share in the guides. But also they write about the information about something that you need instance. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors on earth always try to improve their ability in writing, they also doing some exploration before they write for their book. One of them is this Multimedia Software Engineering (International Series in Software Engineering).
