Schema Matching and Mapping (Data-Centric Systems and Applications)

Schema Matching and Mapping (Data-Centric Systems and Applications)

Requiring heterogeneous information systems to cooperate and communicate has now become crucial, especially in application areas like e-business, Web-based mash-ups and the life sciences. Such cooperating systems have to automatically and efficiently match, exchange, transform and integrate large data sets from different sources and of different structure in order to enable seamless data exchange and transformation.

The book edited by Bellahsene, Bonifati and Rahm provides an overview of the ways in which the schema and ontology matching and mapping tools have addressed the above requirements and points to the open technical challenges. The contributions from leading experts are structured into three parts: large-scale and knowledge-driven schema matching, quality-driven schema mapping and evolution, and evaluation and tuning of matching tasks. The authors describe the state of the art by discussing the latest achievements such as more effective methods for matching data, mapping transformation verification, adaptation to the context and size of the matching and mapping tasks, mapping-driven schema evolution and merging, and mapping evaluation and tuning. The overall result is a coherent, comprehensive picture of the field.

With this book, the editors introduce graduate students and advanced professionals to this exciting field. For researchers, they provide an up-to-date source of reference about schema and ontology matching, schema and ontology evolution, and schema merging.

From reader reviews:

Karen Moore:

The book Schema Matching and Mapping (Data-Centric Systems and Applications) can give more knowledge and also the precise product information about everything you want. So just why must we leave a very important thing like a book Schema Matching and Mapping (Data-Centric Systems and Applications)? A number of you have a different opinion about publication. But one aim this book can give many info for us. It is absolutely suitable. Right now, try to closer with the book. Knowledge or details that you take for that, you could give for each other; you are able to share all of these. Book Schema Matching and Mapping (Data-Centric Systems and Applications) has simple shape nevertheless, you know: it has great and big function for you. You can seem the enormous world by open and read a reserve. So it is very wonderful.

Joseph Tucker:

Now a day people that Living in the era everywhere everything reachable by connect with the internet and the resources inside can be true or not call for people to be aware of each information they get. How people have to be smart in acquiring any information nowadays? Of course the reply is reading a book. Examining a book can help folks out of this uncertainty Information specially this Schema Matching and Mapping (Data-Centric Systems and Applications) book because book offers you rich info and knowledge. Of course the knowledge in this book hundred pct guarantees there is no doubt in it everbody knows.

John Yates:

This book untitled Schema Matching and Mapping (Data-Centric Systems and Applications) to be one of several books which best seller in this year, that is because when you read this book you can get a lot of benefit into it. You will easily to buy this book in the book shop or you can order it by using online. The publisher on this book sells the e-book too. It makes you quickly to read this book, since you can read this book in your Mobile phone. So there is no reason for you to past this reserve from your list.

Soledad Neeley:

Reading a reserve tends to be new life style in this era globalization. With studying you can get a lot of information that can give you benefit in your life. Together with book everyone in this world may share their idea. Publications can also inspire a lot of people. Lots of author can inspire their own reader with their story or their experience. Not only the storyline that share in the guides. But also they write about the data about something that you need example. How to get the good score toefl, or how to teach children, there are many kinds of book that exist now. The authors these days always try to improve their ability in writing, they also doing some analysis before they write with their book. One of them is this Schema Matching and Mapping (Data-Centric Systems and Applications).
